

The best-in-class RMM lite solution

Central delivers exactly what internal IT teams and MSPs need to access and manage their computers – and nothing they don't. Central Premier includes:

- A lightweight, easy-to-use tool that is simple to navigate and quick to onboard new employees, contractors, or clients.
- One centralized dashboard to view and maintain status for all computers.
- Alerts and monitoring so you can identify issues and service interruptions quickly.
- Automated updates for Windows software and third party software. (Coming in 2017)
- Award-winning anti-malware software, powered by Kaspersky Lab, for fast, accurate defense against malware and viruses.

Powered by

KASPERSKY Lab

Two market leaders, one complete IT tool.

Security threats continue to increase in volume and are more complex than ever, making risk management a time-consuming task for IT departments. With Central Premier and Kaspersky Lab you can easily and confidently protect your computers from threats with market-leading anti-malware software, all managed from your Central dashboard.

Protect against the unknown with Kaspersky Lab

Central Premier includes anti-malware software, powered by Kaspersky Lab, so IT teams and MSPs can have peace of mind knowing their computers are protected against even the most savvy threats. Anti-virus management in Central Premier includes the ability to:

- Install Kaspersky Lab anti-malware on managed computers and groups.
- Run scans and update virus definitions.
- Turn on real-time protection to stay ahead of potential issues.
- Easily identify possible threats from your Central dashboard.

Consolidate your IT automation tools and save on resources

Kaspersky Lab is included in the cost of Central Premier subscription packages (a market value of \$30 per computer for the year) which means you can centralize your IT automation and anti-virus needs into one tool for easier, more efficient management.

Powered by Kaspersky Lab, a “Leader” in Gartner’s Magic Quadrant

LogMeIn Central partnered with Kaspersky Lab for its effective, reliable anti-malware detection that has been proven year after year.

- Leader in Gartner’s Magic Quadrant for five years.
- Score of 82% in TOP3 third party testing.
- 300K viruses detected every day by Kaspersky Lab.
